

WESTCONGRESS' ENERGY PROGRAM UPDATES

WestCongress is pleased to announce that **Angela Case** has joined our Energy team as a Senior Account Executive. Angela brings extensive industry experience that complements and adds to the depth of our energy expertise. Based in the Denver area, Angela will focus primarily on local regional and West Coast distribution partners. She is well positioned to support our initiatives to bring the WestCongress reputation for tailored insurance solutions, full claims handling and outstanding customer service to the western United States. Please join us in welcoming Angela to the team. Angela may be reached by email at acase@westcongress.com or by phone at 720.902.4414.

Expanded Energy Appetite

We are also pleased to announce that we have expanded our Energy Program appetite to include **owners, operators, service contractors and products risks for the mining industry and service and maintenance contractors that support utility, industrial and petrochemical plant risks**. This expanded appetite is a natural complement to the program's traditional focus on land based oil and gas industry risks, including site contractors, "over the hole" and "around the hole" service contractors, product manufacturers and distributors, as well as oil and gas lease owners and operators (including operating and non-operating working interests).

Please visit our website (<https://www.westcongress.com/programs/energy>) for complete details on our Energy Program.

Submissions for Energy coverage may be forwarded through our regular submissions email (submissions@westcongress.com).

For additional information about the WestCongress Energy Program, please feel free to contact Jose Rodriguez by phone at 504.291.1194 or by email at jrodriguez@westcongress.com or any of the energy team members:
